Mr. Joe Balog
Norton Construction Company
7500 Exchange Street
Cleveland, Ohio 44125

Dear Mr. Balog:

As per our conversation this morning, I am submitting a leachate analysis of our waste material generated by our hammermill. We are processing aluminum drosses to recover the metallic aluminum by mill and screen separation.

We are presently using Inland Landfill to dispose of our waste. We feel that because of increasing generation, a second site is advisable.

Please let us know, at your earliest convenience, when we may get together to discuss the details.

Thank you in advance.

Sincerely yours,

ALUMINUM SMELTING AND REFINING CO., INC.
